Fund Objective & Strategy

Achieve long-term capital growth with predefined and controlled levels of risk, by investing in stocks listed on the Saudi stock exchange. In addition, the fund will aim to achieve returns that exceed the average by benefiting from the expected economic growth in Saudi Arabia while maintaining a suitable level of diversification for fund assets and reduction of total risk by investing in different market sectors. The

fund manager selects companies selling at a discount to intrinsic value. We identify intrinsic value through rigorous fundamental analysis and research conducted by an experienced investment team. Research is done on a company-by-company basis to determine the economic worth of companies based on projected future earnings and cash flows taking into consideration economy and market activity.

Sector Breakdown

Market Commentary

US markets took a breather in September with both Dow and S&P 500 easing 2.3% and 3.9% respectively as the US presidential race heated up. Elsewhere, a similar trend was evident as MSCI EM Index fell 1.8% whereas MACI EAFE Index lost 2.9% as the investors sought to book profits. On the commodities front, Brent oil corrected sharply by 9.6%- albeit the prices managed to remain above USD40/bbl- as the potential supply resumption from Libya and slower than expected demand recovery weighed on the commodity.

Saudi Tadawul rose 4.5% during the month, trimming the YTD losses to just 1.1%. The returns were driven by Insurance, consumer discretionary and real estate sectors. The accumulation of the consumer savings due to COVID-19 related lockdowns and absence of non-essential travel has boosted the domestic discretionary spending in the Kingdom. September market volumes were exceptionally high at 2x YTD ADV.

Global and local markets continue to face the unprecedented challenges. Given the outbreak of COVID-19 and its adverse impact on commodities' prices, interest

rates and overall economic growth, we expect the Saudi market to yield negative returns in 2020. Looking beyond the pandemic, the downside risks for the regional economies can be much bigger than expected due to the magnified impact on hydrocarbon sector (lower prices and production) and potential slowdown in non-oil sector including travel & tourism, retail, construction etc. which can lead to spending disruptions and higher deficits than budgeted.
