Saudi Exchange

Tadawul All Share Index <.TASI> closed at 11,218.61 point. The break above the horizontal line at 10,860 point enhanced additional buying momentum to 11,350 point before easing down, while a close above this would most likely open the space for further gains to 11,600 point before the psychological level at 12,000 point. On the other side, a dip back below 10,860 point could bring selling pressure back to focus and lead to 10,600 point before 10,200 point.

Medium-term and long-term investors should be aware if the index closes below 10,950 point and 10,200 point, respectively.

Raed Diab

Vice President +(965) 2233 6908 rdiab@kamcoinvest.com Sinad Holding Reuters Ticker: <4080.SE>

Price closed at SAR12.30. The stock shows promise for further gains as it recently jumped over the upper end of the descending trend line. The next overhead resistance level comes at SAR14.20, which if broken would seal a more constructive outlook and lead to SAR17.20. However, back below the support line at SAR11.68 could delay the upward move and trigger a fall to SAR10.95.

R3	20.000

Alandalus Property Co.

Reuters Ticker: <4320.SE>

Price closed at SAR17.86. Given the cross above all MAs on the weekly chart and the move within the ascending trend line, expectation is more towards the bulls and the next target price comes at SAR19.66 before SAR22.15. On the counter side, a fall below the support area at SAR17.40-SAR16.65 could decrease the upward chances and allow a slippage to SAR16.00 and maybe lower to SAR15.20.

Technical Analysis 2

Saudi Airlines Catering Co.

Reuters Ticker: <6004.SE>

Price closed at SAR93.30. The technical picture is positive supported by the move above all MAs on the weekly chart, while eyes now have shifted towards the resistance level at SAR97.20, knowing that a firm close above this would target the critical line at SAR106.75 and maybe higher to SAR117.75. On the negative side, the nearby support levels are located at SAR87.00 and SAR80.00 but only below this will change the picture.

Saudi Telecom Co.

Reuters Ticker: <7010.SE>

Price closed at SAR44.00. The stock witnessed a successful cross over the upper end of the descending trend line and is currently closing above MAs on the weekly chart. Further advance should target the horizontal line at SAR48.90, while above this would most likely promote a jump back to SAR55.92 (high of year 2021). However, only losing the support line at SAR39.00 would shift the picture to the downside.

Technical Analysis 3

Definitions

Technical Analysis: Aims to identify the direction of prices and reveal any indication of possible changes as soon as possible, so it can be used as much as possible in making buying and selling decisions in the most appropriate time in order to minimize risk and maximize profits.

Trend: The general direction of a market or of the price of an asset.

Resistance: A chart point or range that caps an increase in the level of a stock or index over a period of time.

Support: The price level which, historically, a stock has had difficulty falling below. It is thought of as the level at which a lot of buyers tend to enter the stock.

Breakout: A signal that prices are beginning to trend, either upward or downward.

Bull: An investor who thinks the market, a specific security or an industry is likely to rise.

Bear: An investor who thinks the market, a specific security or an industry is likely to decline.

Channel: is two parallel trend lines either rising or declining.

Consolidation Area: is a sideways movement in prices that interrupts or reverse a trend.

Moving Average (MA): The most common applications of MAs are to identify the trend direction and to determine support and resistance levels.

MACD (Moving Average Convergence-Divergence): A trend-following momentum indicator that shows the relationship between two moving averages of prices.

Relative Strength Index: A technical momentum indicator (ranges from 0 to 100) that compares the magnitude of recent gains to recent losses in an attempt to determine overbought and oversold conditions of an asset.

Overbought: A situation in which the price of a security has risen to such a degree that an oscillator has reached its upper bound. This is generally interpreted as a sign that the price of the asset is becoming overvalued and may experience a pullback.

Oversold: A situation in which the price of a security has fallen to such a degree that an oscillator has reached its upper bound. This is generally interpreted as a sign that the price of the asset is becoming undervalued and may represent a buying opportunity for investors.

Fibonacci: A term refers to areas of support or resistance and to help identify strategic places for transactions to be placed, target prices or stop losses.

On Balance Volume (OBV): is a simple running total of up day (added) and down day (subtracted) volume. If OBV is moving with price, it confirms the current trend. Divergences between OBV and price indicates the price may be due for a reversal.
