Boursa Kuwait

All Share Index <.BKA> closed at 6,940.92 point. The market will be leaning more towards the bulls as long as it closes above the support zone at 6,790 point-6,740 point, knowing that below this could be a serious bearish sign that would lead to 6,550 point before 6,331 point. On the positive side, a jump over the first resistance line at 7,000 point should enhance additional strength towards 7,120 point and 7,210 point, but to confirm a bullish continuation pattern, the index should print a strong foothold above 7,357 point (all-time high).

Medium-term and long-term investors can stay in the market with a stop-loss below 6,500 point and 6,120 point, respectively.

Boubyan Bank

Reuters Ticker: <BOUK.KW>

Price closed at KWD0.773. The stock eased down after it posted a top at KWD0.835 (history high), while further weaknesses below KWD0.755 will call for additional downward correction to KWD0.715 (38.2% level of the Fibonacci Retracements from KWD0.516-KWD0.835) and maybe lower to KWD0.675 (50% level). However, only surpassing KWD0.835 will ra-activate the buying momentum and target KWD0.900.

ALAFCO Aviation Lease and Finance Co.

Reuters Ticker: <ALAF.KW>

Price closed at KWD0.219. Although there are no signs of reversal at present, but the stock needs to maintain a close above the support level at KWD0.194, knowing that a dip below it could increase the downside and call for a re-test of the strong line at KWD0.138. On the other side, only a jump over the recent high at KWD0.256 will shift the move to the positive trading range at KWD0.256-KWD0.305.

Technical Analysis 2

Jazeera Airways Co.

Reuters Ticker: <JAZK.KW>

Price closed at KWD1.270. The upward momentum has decreased after posting an all-time high at KWD1.345, but the stock remains within the positive territory. Further attempts to move down could reach KWD1.150 and KWD1.080, while below this will lead to KWD0.981. However, managing to close above KWD1.345 will call for another advance to the next resistance level at KWD1.500.

Kuwait Real Estate Co.

Reuters Ticker: <KREK.KW>

Price closed at KWD0.177. The stock did well and reached levels last seen on May-2008, meanwhile it maintains a close above its MAs on the weekly chart and within the ascending trend line; however, a fall below KWD0.163 could delay any upward move and call for a downward correction to KWD0.140. On the counter side, a successful cross over the recent high at KWD0.193 will call for another leg up to KWD0.210 before KWD0.234.

Technical Analysis 3

Definitions

Technical Analysis: Aims to identify the direction of prices and reveal any indication of possible changes as soon as possible, so it can be used as much as possible in making buying and selling decisions in the most appropriate time in order to minimize risk and maximize profits.

Trend: The general direction of a market or of the price of an asset.

Resistance: A chart point or range that caps an increase in the level of a stock or index over a period of time.

Support: The price level which, historically, a stock has had difficulty falling below. It is thought of as the level at which a lot of buyers tend to enter the stock.

Breakout: A signal that prices are beginning to trend, either upward or downward.

Bull: An investor who thinks the market, a specific security or an industry is likely to rise.

Bear: An investor who thinks the market, a specific security or an industry is likely to decline.

Channel: is two parallel trend lines either rising or declining.

Consolidation Area: is a sideways movement in prices that interrupts or reverse a trend.

Moving Average (MA): The most common applications of MAs are to identify the trend direction and to determine support and resistance levels.

MACD (Moving Average Convergence-Divergence): A trend-following momentum indicator that shows the relationship between two moving averages of prices.

Relative Strength Index: A technical momentum indicator (ranges from 0 to 100) that compares the magnitude of recent gains to recent losses in an attempt to determine overbought and oversold conditions of an asset.

Overbought: A situation in which the price of a security has risen to such a degree that an oscillator has reached its upper bound. This is generally interpreted as a sign that the price of the asset is becoming overvalued and may experience a pullback.

Oversold: A situation in which the price of a security has fallen to such a degree that an oscillator has reached its upper bound. This is generally interpreted as a sign that the price of the asset is becoming undervalued and may represent a buying opportunity for investors.

Fibonacci: A term refers to areas of support or resistance and to help identify strategic places for transactions to be placed, target prices or stop losses.

On Balance Volume (OBV): is a simple running total of up day (added) and down day (subtracted) volume. If OBV is moving with price, it confirms the current trend. Divergences between OBV and price indicates the price may be due for a reversal.
