

## Technical Analysis – Saudi Stock Exchange

09-January-2017

### In this Report...

Tadawul Index.....	1
Saudi Chemical.....	2
Sipchem.....	2
Arabian Cement.....	3
Qassim Cement.....	3

### Saudi Stock Exchange

**Tadawul All Share Index <.TASI> closed at 7,081.71 point.** Market sentiment turned cautious as the bullish momentum weakened with the resistance level at around 7,350 point continuing to frustrate the upside move. This could encourage some sellers to step in and allow some natural correction downwards to take place, knowing that the nearby support levels are located at 7,000 point, 6,750 point and 6,500 point. However, a successful break above 7,350 point would enhance buying momentum and call for a gradual increase towards the psychological level at 8,000 point. Daily RSI indicators is more towards the bears at present, while the weekly one is looking neutral.

Medium-term and long-term investors can stay in the market as long as the index closes above 6,500 point and 6,750 point, respectively.

## Saudi Chemical Co.

Reuters Ticker: &lt;2230.SE&gt;

**Price closed at SAR42.20.** The upward move has lost its steam after it recovered from last year low at SAR27.00 and is currently trading within the range of SAR38.00-SAR44.00. However, an escape out of this zone is needed to anticipate the next move, knowing that a break above SAR44.00 would re-activate the positive tone and promote SAR50.00 and SAR55.00. However, a dip below SAR38.00 could lead to further losses to SAR35.00 and SAR32.00 before inching upwards once again.

RSI	56.394
MACD	-1.82
ROC	39.274
M10	40.00
M50	39.20
M100	46.60
S1	38.00
S2	35.00
S3	32.00
R1	43.20
R2	50.00
R3	55.00

## Saudi International Petrochemical Co.

Reuters Ticker: &lt;2310.SE&gt;

**Price closed at SAR17.60.** The stock eased down after finding a resistance level at SAR19.75 but the picture remains positive as it continues to move above the support zone at SAR16.00-SAR14.00. However, losing this could most likely bring back to focus the strong horizontal line at SAR12.00. On the counter side, further attempts to go up cannot be ruled out, while a jump over SAR19.75 would target SAR23.50 and SAR27.00.

RSI	63.649
MACD	0.57
ROC	34.351
M10	17.20
M50	14.60
M100	16.10
S1	16.00
S2	14.00
S3	12.00
R1	19.75
R2	23.50
R3	27.00

## Arabian Cement Co.

Reuters Ticker: &lt;3010.SE&gt;

**Price closed at SAR43.70.** The technical picture is not clear at present as to where the stock would move on the coming period. The price encounters a tiny resistance level at SAR46.00, while above it would target last month high at SAR52.00; however, it is required for the bulls to surpass SAR52.00 to increase the chances of reaching SAR57.00 and SAR63.00. On the negative side, a fall below SAR43.00 would allow a re-visit of SAR37.50 and maybe SAR34.00.

RSI	47.291
MACD	-0.68
ROC	15.608
M10	45.75
M50	45.05
M100	19.05
S1	43.00
S2	37.50
S3	34.00
R1	49.50
R2	52.00
R3	63.00

## Qassim Cement Co.

Reuters Ticker: &lt;3040.SE&gt;

**Price closed at SAR62.25.** The price showed continuous reluctance to overcome the horizontal line at SAR68.25, which in turn triggered some weaknesses. However, falling below the support level at SAR61.00 would lead to SAR57.00 and SAR51.00 but a re-visit to SAR48.00 is not favored. On the counter side, managing to break above SAR68.25 would call for another leg up towards an initial target at SAR77.75.

RSI	52.017
MACD	0.04
ROC	20.874
M10	65.25
M50	60.40
M100	66.15
S1	61.00

S3	48.00
R1	68.25
R2	77.75
R3	82.25

## Definitions

**Technical Analysis:** Aims to identify the direction of prices and reveal any indication of possible changes as soon as possible, so it can be used as much as possible in making buying and selling decisions in the most appropriate time in order to minimize risk and maximize profits.

**Trend:** The general direction of a market or of the price of an asset.

**Resistance:** A chart point or range that caps an increase in the level of a stock or index over a period of time.

**Support:** The price level which, historically, a stock has had difficulty falling below. It is thought of as the level at which a lot of buyers tend to enter the stock.

**Breakout:** A signal that prices are beginning to trend, either upward or downward.

**Bull:** An investor who thinks the market, a specific security or an industry is likely to rise.

**Bear:** An investor who thinks the market, a specific security or an industry is likely to decline.

**Channel:** is two parallel trend lines either rising or declining.

**Consolidation Area:** is a sideways movement in prices that interrupts or reverse a trend.

**Moving Average (MA):** The most common applications of MAs are to identify the trend direction and to determine support and resistance levels.

**MACD (Moving Average Convergence-Divergence):** A trend-following momentum indicator that shows the relationship between two moving averages of prices.

**Relative Strength Index:** A technical momentum indicator (ranges from 0 to 100) that compares the magnitude of recent gains to recent losses in an attempt to determine overbought and oversold conditions of an asset.

**Overbought:** A situation in which the price of a security has risen to such a degree that an oscillator has reached its upper bound. This is generally interpreted as a sign that the price of the asset is becoming overvalued and may experience a pullback.

**Oversold:** A situation in which the price of a security has fallen to such a degree that an oscillator has reached its upper bound. This is generally interpreted as a sign that the price of the asset is becoming undervalued and may represent a buying opportunity for investors.

**Fibonacci:** A term refers to areas of support or resistance and to help identify strategic places for transactions to be placed, target prices or stop losses.

**On Balance Volume (OBV):** is a simple running total of up day (added) and down day (subtracted) volume. If OBV is moving with price, it confirms the current trend. Divergences between OBV and price indicates the price may be due for a reversal.
