# Qatar Stock Exchange

**QE Index <.QSI> closed at 12,893.130 point.** The market reached the 61.8% level of the Fibonacci Retracements from 11,386 point-14,930 point at around 12,675 point before seeing some relief. Further slippage below this could deepen the correction mode and lead to the support zone at 12,040 point-11,800 point, while below this would target 11,386 point. However, a sharp recovery is not favored on the coming period, but the index could see some attempts to move up, knowing that the nearby resistance levels are located at 13,250 point, 13,790 and 14,160 point.

Medium-term and long-term investors can stay in the market with a stop-loss below 12,675 point and 11,800 point, respectively.

Qatar Gas Transport Co.

Reuters Ticker: <QGTS.QA>

**Price closed at QAR3.636.** The stock has found support at QAR3.315, while below it would most likely shift the sentiment towards the bears and lead to the strong horizontal line at QAR2.990. On the counter side, a jump over the resistance level at QAR3.808 (high of this year) along with an increase in trading activity will call for a positive continuation pattern and target the next layer at QAR4.500.

# **Commercial Bank of Qatar**

Reuters Ticker: <COMB.QA>

**Price closed at QAR7.000.** The stock retreated down after posting a multi-year high at QAR8.700. Further weaknesses below the support level at QAR6.600 will increase the downside risk and lead to QAR5.880 before QAR5.350. However, a move back above QAR7.300 will be a positive sign that should target QAR8.000 and QAR8.700, but only above the last line will re-activate the buying momentum.

# **Qatar Navigation Co.**

Reuters Ticker: <QNNC.QA>

**Price closed at QAR8.338.** The stock has been trading within the range of QAR9.000-QAR8.120 for the last 4-months and needs to escape out of this to indicate the next move, knowing that a dip below QAR8.120 will trigger additional slippage to QAR7.750, while below this will lead to QAR6.825. However, a firm close above QAR9.000 should call for another leg up to QAR9.700 and maybe more to QAR10.990.

### Qatar Islamic Bank

Reuters Ticker: <QISB.QA>

**Price closed at QAR23.590.** The stock eased down after posting an all-time high at QAR28.000 but remains within the ascending trend line and above the 50-weeks and 100-weeks MAs. A fall below QAR21.00 will lead to QAR19.100, while below it would trigger QAR17.200. On the other side, only a jump over QAR28.000 will decrease the downside risk and lead to QAR31.000.

#### **Definitions**

Technical Analysis: Aims to identify the direction of prices and reveal any indication of possible changes as soon as possible, so it can be used as much as possible in making buying and selling decisions in the most appropriate time in order to minimize risk and maximize profits.

Trend: The general direction of a market or of the price of an asset.

Resistance: A chart point or range that caps an increase in the level of a stock or index over a period of time.

Support: The price level which, historically, a stock has had difficulty falling below. It is thought of as the level at which a lot of buyers tend to enter the stock.

Breakout: A signal that prices are beginning to trend, either upward or downward.

Bull: An investor who thinks the market, a specific security or an industry is likely to rise.

Bear: An investor who thinks the market, a specific security or an industry is likely to decline.

Channel: is two parallel trend lines either rising or declining.

Consolidation Area: is a sideways movement in prices that interrupts or reverse a trend.

Moving Average (MA): The most common applications of MAs are to identify the trend direction and to determine support and resistance levels.

MACD (Moving Average Convergence-Divergence): A trend-following momentum indicator that shows the relationship between two moving averages of prices.

Relative Strength Index: A technical momentum indicator (ranges from 0 to 100) that compares the magnitude of recent gains to recent losses in an attempt to determine overbought and oversold conditions of an asset.

**Overbought:** A situation in which the price of a security has risen to such a degree that an oscillator has reached its upper bound. This is generally interpreted as a sign that the price of the asset is becoming overvalued and may experience a pullback.

**Oversold:** A situation in which the price of a security has fallen to such a degree that an oscillator has reached its upper bound. This is generally interpreted as a sign that the price of the asset is becoming undervalued and may represent a buying opportunity for investors.

Fibonacci: A term refers to areas of support or resistance and to help identify strategic places for transactions to be placed, target prices or stop losses.

**On Balance Volume (OBV):** is a simple running total of up day (added) and down day (subtracted) volume. If OBV is moving with price, it confirms the current trend. Divergences between OBV and price indicates the price may be due for a reversal.

#### Risk Warnings

Any prices, valuations or forecasts are indicative and are not intended to predict actual results, which may differ substantially from those reflected. The value of an investment may go up as well as down. The value of and income from any investment may fluctuate from day to day as a result of changes in relevant economic markets (including, without limitation, foreseeable or unforeseeable changes in interest rates, foreign exchange rates, default rates, prepayment rates, political or financial conditions, etc.).

Past performance is not indicative of future results. Any opinions, estimates, valuations or projections (target prices and ratings in particular) are inherently imprecise and a matter of judgment. They are statements of opinion and not of fact, based on current expectations, estimates and projections, and rely on beliefs and assumptions. Actual outcomes and returns may differ materially from what is expressed or forecasted. There are no guarantees of future performance. Certain transactions, including those involving futures, options, and other derivatives, give rise to substantial risk and are not suitable for all investors. This document does not propose to identify or to suggest all of the risks (direct or indirect) which may be associated with the investments and strategies referred to herein.

#### **Conflict of Interest**

Kamco Invest and its affiliates provide full investment banking services, and they and their directors, officers and employees, may take positions which conflict with the views expressed in this document. Salespeople, traders, and other professionals of Kamco Invest may provide oral or written market commentary or trading strategies to our clients and our proprietary trading desks that reflect opinions that are contrary to the opinions expressed in this document. Our asset management area, our proprietary trading desks and investing businesses may make investment decisions that are inconsistent with the recommendations or views expressed in this document. Kamco Invest may have or seek investment banking or other business relationships for which it will receive compensation from the companies that are the subject of this document. Facts and views presented in this document have not been reviewed by, and may not reflect information known to, professionals in other Kamco Invest business areas, including investment banking personnel. United Gulf Bank, Bahrain owns majority of Kamco Invest's shareholding and this ownership may create, or may create the appearance of, conflicts of interest.
