### Saudi Stock Exchange

**Tadawul All Share Index <.TASI> closed at 7,106.22 point.** The weaknesses seen on the last session is considered natural after a prolonged bullish move and as it approached the resistance level at 7,350 point. The overall technical picture remains in favor of the bulls as the market breached last April high at 6,875 point along with its move above MAs, while a close above 7,350 point is needed to anticipate a gradual increase to the psychological level at 8,000 point. However, failing to do so could allow some downward correction to take place towards 7,000 point, 6,750 point and maybe 6,500 point. Weekly and daily RSI indicators are neutral at present but reside on the overbought territory.

Medium-term and long-term investors can stay in the market as long as the index closes above 6,500 point and 6,750 point, respectively.

## Hail Cement Co.

Reuters Ticker: &lt;3001.SE&gt;

**Price closed at SAR11.60.** The stock recovered from all time low at SAR9.00 and further gains could still be seen on the coming period. A firm close above SAR11.50 would shift the trading range to SAR11.50-SAR13.90, while a jump over SAR13.90 will confirm a return to SAR15.90 and maybe more to SAR17.70. On the counter side, the nearby support levels are located at SAR10.55 and SAR9.90 but only a dip below this would bring back to focus SAR9.00.

RSI	51.220
MACD	-0.66
ROC	-0.855
M10	10.80
M50	11.65
M100	13.70
S1	10.55
S2	9.90
S3	9.00
R1	13.90
R2	15.90
R3	17.70

## Yanbu Cement Co.

Reuters Ticker: &lt;3060.SE&gt;

**Price closed at SAR37.90.** The stock did well after it approached the strong support level at SAR25.00, while it encounters now a resistance line at SAR41.00. However, the bulls are required to show some buying interest above SAR41.00 to accelerate the positive momentum and call for an advance towards SAR45.50 before SAR52.25. On the other side, back below SAR34.00 would trigger SAR31.00, while a fall below here could increase the risk of re-testing SAR25.00.

RSI	54.777
MACD	-3.27
ROC	10.174
M10	32.85
M50	37.65
M100	43.80
S1	34.00
S2	31.00
S3	25.00
R1	41.00
R2	52.25
R3	56.75

## The Mediterranean and Gulf Insurance and Reinsurance Co.

Reuters Ticker: &lt;8030.SE&gt;

**Price closed at SAR24.40.** The current technical picture of the stock is positive, while focus has shifted towards the horizontal line at SAR25.90, which if broken would seal a more constructive outlook and call for another leg up towards SAR31.00 before SAR39.00. However, an aggressive move down is not favored but some attempts to go south could be seen, knowing that the support level at SAR17.25 should prevent a fall to this year low at SAR13.70.

RSI	65.434
MACD	-0.74
ROC	34.807
M10	20.75
M50	20.30
M100	24.45
S1	22.00
S2	17.25
S3	13.70
R1	25.90
R2	31.00
R3	39.00

## Amana Cooperative Insurance Co.

Reuters Ticker: &lt;8310.SE&gt;

**Price closed at SAR8.15.** Although the upward move has stalled on the last few weeks but further advance is still expected to be seen on the medium-term period. A strong support level was formed at SAR5.30 and only below this would delay the buying potential and re-instate the negative move. However, a cross over the tiny resistance line at SAR8.65 would promote SAR11.60 and SAR13.75 but only above this will confirm a base at SAR5.30 and establish a new bull trend towards SAR18.00.

RSI	48.487
MACD	-0.47
ROC	-8.939
M10	7.65
M50	8.65
M100	9.20
S1	7.50
S2	6.65
S3	5.30
R1	8.65
R2	11.60
R3	13.75

## Definitions

**Technical Analysis:** Aims to identify the direction of prices and reveal any indication of possible changes as soon as possible, so it can be used as much as possible in making buying and selling decisions in the most appropriate time in order to minimize risk and maximize profits.

**Trend:** The general direction of a market or of the price of an asset.

**Resistance:** A chart point or range that caps an increase in the level of a stock or index over a period of time.

**Support:** The price level which, historically, a stock has had difficulty falling below. It is thought of as the level at which a lot of buyers tend to enter the stock.

**Breakout:** A signal that prices are beginning to trend, either upward or downward.

**Bull:** An investor who thinks the market, a specific security or an industry is likely to rise.

**Bear:** An investor who thinks the market, a specific security or an industry is likely to decline.

**Channel:** is two parallel trend lines either rising or declining.

**Consolidation Area:** is a sideways movement in prices that interrupts or reverse a trend.

**Moving Average (MA):** The most common applications of MAs are to identify the trend direction and to determine support and resistance levels.

**MACD (Moving Average Convergence-Divergence):** A trend-following momentum indicator that shows the relationship between two moving averages of prices.

**Relative Strength Index:** A technical momentum indicator (ranges from 0 to 100) that compares the magnitude of recent gains to recent losses in an attempt to determine overbought and oversold conditions of an asset.

**Overbought:** A situation in which the price of a security has risen to such a degree that an oscillator has reached its upper bound. This is generally interpreted as a sign that the price of the asset is becoming overvalued and may experience a pullback.

**Oversold:** A situation in which the price of a security has fallen to such a degree that an oscillator has reached its upper bound. This is generally interpreted as a sign that the price of the asset is becoming undervalued and may represent a buying opportunity for investors.

**Fibonacci:** A term refers to areas of support or resistance and to help identify strategic places for transactions to be placed, target prices or stop losses.

**On Balance Volume (OBV):** is a simple running total of up day (added) and down day (subtracted) volume. If OBV is moving with price, it confirms the current trend. Divergences between OBV and price indicates the price may be due for a reversal.
